Full-Stack web developer leveraging my Project Management background to build applications efficiently, giving the user a better experience on the web. Recently earned a certificate in full stack development from Georgia Tech, with newly developed skills in HTML, JavaScript, CSS, React.js, Node Js, Express, MySql, Mongoose and responsive web design. I am an innovative problem solver with years of experience working on teams, who is passionate about developing apps, with a focus on mobile-first design and development. With each project, my aim is to best engage my audience for an impactful user experience. I applied aspects of UX and agile development in a recent project. I worked on a team of four to develop a MERN app that helps current and past students learn from each other in a forum style setting. I'm excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.

TECHNICAL SKILLS

JavaScript, CSS, HTML MySQL - React, Node.js,
MongoDB, GraphQL, Express.js, Materialize, Material UI, GitHub, Heroku, Vercel
